

58CMA Comfort™ 80

4-Way Multipoise Oil-Fired Furnace
with Beckett Burner
Up to 80% AFUE

58CLA/CLR - Oil-Fired Furnaces

This premium line of oil furnaces features the latest combustion technology. The exclusive stainless steel primary heat exchanger is direct fired without the ceramic pre-combustion chamber used in most other oil furnaces. This technology eliminates the maintenance associated with the ceramic chamber. It also allows every furnace to be 100% fire tested at the factory - something that cannot be done with ceramic pre-chambers.

The 58CLA/CLR furnaces are each available in two sizes from the factory. Each size can be fired at three different firing rates with matched nozzles: The 105-size can be fired at 70,000, 91,000 and 105,000 Btuh. The 120-size can be fired at 119,000, 140,000 and 154,000 Btuh. Combine the wide firing rate range with the low profile of the 58CLA /CLR and you have the most versatile line of oil furnaces on the market today.

- 80%+ AFUE rating
- 100% combustion and heat exchanger pressure test
- Cooling relay and 40-va transformer
- Unique combustion silencer for quiet operation
- Barometric draft control
- Direct-drive blower motor
- Three heating capacities provided by each model and appropriate burner nozzle
