

HUMCCSBP Performance Series

Performance Series Humidifier

Humidifiers

Dry, heated indoor air is often responsible for irritated sinuses, noses or throats, itchy skin, static electricity, and cracked woodwork, wallpaper and paint.

A humidifier is the solution. The humidifier evenly distributes moisture throughout the home to help eliminate the problems associated with dry, heated air. Also enjoy enhanced comfort and energy savings since humidified air actually feels warmer than dry air, meaning the thermostat can be set at a lower temperature for more economical operation.

STANDARD FEATURES:

- **EASY ACCESS FOR CLEANING AND MAINTENANCE**
The treated aluminum pad ensures top performance. Front access door allows for quick and convenient removal and replacement of pad.
- **BUILT-IN BYPASS DAMPER ON LBP AND SBP MODELS**
- **SMOOTH, LOW NOISE OPERATION**
Nearly silent operation is the result of Carrier's precision-engineered Fan and Motor combination. Air is drawn through the evaporator pad quietly and efficiently, turning water into the water vapor that humidifies the home.
- **LONG LASTING, ATTRACTIVE COVER**
The outside casing of all Carrier Humidifiers are made from durable UV-resistant plastic. This plastic resists deterioration, even when exposed to ultra-violet light sources common in many systems.
- **OPTIMAL DISTRIBUTION OF MOISTURE**
Through the combination of Carrier's Solenoid Valve and water distribution system, homes will benefit from the optimal distribution of moisture.
- **FOUR HUMIDITY CONTROL OPTIONS**
Choose between four separate control options Humidistat, HumidiTrac™, Thermidistat™, and Infinity™ Control. Each provides precise control over the humidity levels in the home.
